PROFILE

Third-year Creative Software Developer student at Grafisch Lyceum Rotterdam, focused on front-end development and comfortable picking up new frameworks and tools as a project requires. Built four web and mobile applications in small Scrum teams, contributing UI design, component architecture and front-end logic. Looking for a front-end internship to contribute to production code and grow into full-stack responsibilities.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, HTML, CSS / SCSS, SQL, Python
Frameworks	React, Next.js, SolidJS / SolidStart, React Native (Expo), Node.js
Libraries	GSAP, Three.js, Tailwind CSS / NativeWind
Tools & platforms	Git, GitHub, Supabase, PostgreSQL, Vercel, Netlify
Practices	Responsive design, UI/UX design, component-based architecture, Scrum, code reviews

EDUCATION

Creative Software Developer, Grafisch Lyceum Rotterdam Sept 2024 – present

- Coursework: programming fundamentals, web development (HTML/CSS/JavaScript), databases (SQL), OOP, UX/UI
- Team projects in Scrum sprints using Git, with code reviews and presentations of deliverables

PROJECTS

MeloStudio – browser-based beatmaker School project · team of 3

SolidStart, TypeScript, Tone.js, SCSS, GSAP · github.com/Gaspaco/MeloStudio

- Contributed to the front-end logic and proposed the initial design concepts, which the team developed into the final interface.
- Presented at a public school showcase, where visitors in the halls tested the app and made their own beats.

Melograph – music listening web app School project · team of 3

Next.js, React, TypeScript, SCSS, GSAP · melograph.vercel.app · github.com/Gaspaco/melograph

- Responsible for the front-end design and for deciding the component structure of the application.
- Focused on a cleaner, more carefully designed listening experience than existing music platforms.

Health App – fitness and nutrition app School project

React Native (Expo), TypeScript, NativeWind, Supabase · github.com/Gaspaco/Health-app

- Built the coach-side profile, working mainly on the front end with some back-end work.
- Users follow exercises recommended by coaches, track hydration and food intake, and find recipes for healthy meals.

Rich Marktplaats – luxury marketplace web app School project

github.com/NickDlma101723/Rich-marktplaats

- Contributed to the front end, designed the navigation menu and helped select the UI components.
- A marketplace in the style of Marktplaats, redesigned for a wealthy audience buying yachts and hypercars.

Other projects: Yaetype, Yaetask – see jorgesimoes.com
